

The Willink Monthly Maths Puzzle

April 2022

Place each of the symbols into the grid below. But be careful - the same item cannot appear twice in any row, column or within any block of 6 squares!

Four friends each have some Easter eggs to give to their friends.
 Tom has 3 more than Mia.
 Darcy has 5 more than Lucy.
 Darcy has 2 more than Tom.
 Mia has 6 eggs.
 How many eggs do they have altogether?

James and Jess go on an Easter egg hunt. Starting from their home, they walk in a straight line on a bearing of 160° for a quarter of an hour, at an average speed of 1.5m/s. They then turn due East and walk in a straight line for 1km. Calculate the distance and bearing of their destination from their home.

Well done to Chloe (8N) who successfully answered last month's puzzle!

Submit your answer either to your Maths teacher, to Miss Bush in M1, or by emailing hbush@willink.w-berks.sch.uk
 Make sure you submit your answer on or before **Friday 29th April!**
